Everyone:

As you know, I have been reporting out researchIT CT RBDigital downloadable eAudiobook and eBook usage statistics on a monthly basis for quite some time. Very recently Recorded Books updated my admin account to display statistical reporting functions that I was unaware were available to me until now. This admin update makes it clear that I have been reporting only parent account usage ("ICONN") of our statewide collection without including child account usage (individual libraries). Therefore, I have generated new, corrected eAudiobook and eBook usage reports for January 2019. Those new reports replace the original reports here:

eAudiobooks:
https://libguides.ctstatelibrary.org/researchIT_CT/about-researchIT_CT/usage-statistics#s-lg-box-wrapper-24460907

eBooks:
https://libguides.ctstatelibrary.org/researchIT_CT/about-researchIT_CT/usage-statistics#s-lg-box-wrapper-24460897

From the above you will notice:
• Statistics in the original January report were underreported for the state as a whole
• Individual child accounts are broken out by library name

You can now find your library by name in column A of both reports and sum your circulations from there.

To correct statewide usage for the first half of FY 2019, I have generated eAudiobook and eBook usage reports (one each) for the time period July 1 - December 31, 2018 and have placed them in the above boxes, respectively. Here too you can find your individual library in column A in order to sum your circulations for that six-month period.
